General View

Having a wide technical formation, I have oriented it to Internet world.

I started with Informatic System Administration specializing in web programming. I continued with Graphic Design and Multimedia specialicing again in web. Adding knowledge in marketing, Search Engine Optimization and usability/accessibility, we can complete web development.

Experimented in project analysis, applying requests, database creation and programming, I qualify for develop a web functional needs. Always leaned in design and usability basis, usability and web standards, I can create aesthetic and dynamic webs.

This specialization doesn't mean that I can't do other multimedia works, as animation, CDs/DVDs or printed publications.

From my beginning at year 2000, I always was concerned about my continued education, trying to keep current in the sector news.

In all companies I was, I responded satisfactorily, integrating myself in the team. You can contact with the companies for references. More information in their webs below.
